Two Friends, Two Knees, and One Great Rehab Success Story

Pictured: Joann Walker, Tad Filon and Carol Crozier

Friends Joann Walker and Carol Crozier were both told that they needed knee surgery and confirmed with their surgeon in Green Bay that they could schedule their surgeries the same day. With Joann's past rehab experience at Rennes Health & Rehab-Peshtigo West and the positive comments about Rennes in the community, "We knew Rennes was the way to go for our rehab." Joann and Carol identified the benefit of going to a rehab center to get short-term therapy and both felt that this would be a great experience to rehab together. Rennes West made this possible.

Prior to surgery, Joann and Carol toured Rennes and met with their therapist, which offered confidence in their recovery and alleviated any anxiety. "The designated rehab wing with dining area, in-house therapy team, private suites and pleasant staff made us look forward to our rehab experience!"

"After our surgeries, the Rennes Travel Van picked both of us up in Green Bay at the hospital and transported us to Rennes Health & Rehab Center-Peshtigo West. All of the staff were aware of our needs and not only provided day-to-day therapy and care but education.

We owe credit to Tad, our Physical Therapist and the therapy staff for the excellent results we achieved following our surgeries. The therapy staff even said that if we have problems after going home to just call."

"There was a great selection of food, transportation was great, everyone was pleasant and happy hour was good!" Going through the total knee process, the surgery, being away from home and the pain can be difficult, but Joann and Carol found their rehab experience to be not only successful but fun. "It was like a week at a spa," said Carol. "We rate Rennes as **OUTSTANDING** and would recommend it to anyone!"
